EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Vlahos on June 13, 2006.

The application has been amended as follows:

Claims 1-15 and 17-20 are cancelled.

Claim 16 is rewritten as follows –

A tanning apparatus comprising a flexible block (42) with a plurality of slots (44) sized for receiving individual digits (48) of a user, and ultraviolet ray-generating means (46) located in portions (49) of the block (42) between the slots (44) for tanning skin of the user between the digits (48) of the user when the digits (48) are received in the slots (44) wherein at least the surfaces of the slots (44) facing the digits are transparent to ultraviolet rays.

Reasons For Allowance

The prior art does not disclose or fairly suggest a tanning apparatus comprising a flexible block with a plurality of openings of an appropriate size for receiving a users individual digits, said flexible block having ultraviolet ray generating means between the openings and the surface of the openings being transparent to ultraviolet rays. Tanning devices are well known in the art including tanning beds (U.S. Patent 4,754,146), tanning booths (U.S. Patent 4,469,102), tanning pod with recliner (U.S. Patent 4,989,600), tanning chair (U.S. Patent 5,086,769), and an apparatus for tanning feet (U.S. Patent 5,466,248). Devices for exposing fingernails to UV

radiation for curing the adhesive for artificial nails are also known (U.S. Patents 4,979,523 and 4,612,444), but the entire hand is exposed, not individual nails. A device for tanning individual digits, e.g. fingers or toes, is novel and unique.
